Campbell Coupling Selection Guide

From the Selection Guide below, choose an appropriate coupling based on the hose type and application working pressure.

Hose construction will affect the working pressure of a hose system. The following chart outlines the maximum working pressure of each Campbell coupling based on the type and size of hose used, as well as the attachment, and identifies the Campbell catalog section in which the coupling can be found.

Hose System Components			MAX. SYSTEM WORKING PRESSURE (PSI @ 70°F)													
			Hose Size													
Fitting/Coupling	Attachment	Hose Type	1/2	3/4	1	1-1/4	1-1/2	2	2-1/2	3	4	6	8	10	12

HOSE SYSTEM PRESSURE DERATING MULTIPLIERS FOR ELEVATED TEMPERATURES (°F)*										
Hose Type	70°	90°	150°	200°	250°	300°	350°	400°	450°	500°
Steam, Hot Tar, Asphalt	1.00	0.95	0.81	0.68	0.56	0.44	0.32	0.20	0.08	N/R
PVC	1.00	0.82	0.30	N/R	N/R	N/R	N/R	N/R	N/R	N/R
All other	1.00	0.91	0.64	0.42	0.20	N/R	N/R	N/R	N/R	N/R
No hose: weld-on or union	1.00	1.00	0.97	0.95	0.92	0.89	0.86	0.84	0.81	N/R

* System temperature is affected by both the media and the environment. N/R means NOT RECOMMENDED!

- For normal fluids (not hazardous, combustible, flammable, volatile, corrosive, ammonia or LPG). Individual testing should be employed for non-normal fluids to ensure capability. Pressures shown are only valid for the fitting/coupling/attachment and hose combinations indicated and for their threaded mating parts. System working pressure does not include end pull forces. Not for plastic fittings/couplings. All hose systems must be assembled using Campbell procedures and crimp specifications. See elevated temperature derating chart above. Consult factory for reduced temperatures. **Never exceed the working pressure of the lowest rated component in the hose system.** Maximum working pressure includes the highest pressure the system will experience, such as spikes, surges, and water hammer effects. (For example: If a system consists of a hose rated to 150 PSI and the couplings are rated to 500 PSI, the system should never be used in excess of 150 PSI.)

- Hose descriptions: **Air** - any smooth bore rubber air or water hose. Includes most general purpose hose; **Chemical** - any smooth bore rubber chemical hose, including plastic lined (PTFE, UHMW, XLPE). Does not include soft tube hose; **PVC** - any smooth bore PVC or vinyl hose; **Rubber** - any smooth bore rubber hose except steam, hot tar & asphalt, chemical, and soft tube hose; **Soft** - any smooth bore rubber hose with a thick, soft tube. Usually gum rubber and some food-grade hose; **Steam** - includes hot tar and asphalt; **Sanitary** - includes any food-grade hose

3) Ball & Socket pressure ratings are based on 1.5x WP.

4) Due to limitations with flanges, consult factory for temperatures other than 70°F.

5) Campbell COBRA Cam & Groove Couplings are identified by the name "Campbell" on the body, by the ferrule interlock groove, and by the part number, which includes a "C" suffix. Not for air or gas service. 1

6) Maximum temperature 160°F.

Campbell Test Reports

Abbreviated Reports and Results

Campbell engineering has conducted nearly 1,000 hydrostatic tests. The following are results from several popular products. Please contact our customer support team to receive test reports on other Campbell products.

The Safety Factor

The RMA requires that hose working pressures include a safety factor commensurate with their intended application. Most hoses are required to meet a 4x safety factor, except the following: Water hose rated under 150 PSI requires a 3x safety factor; Steam hose requires a 10x safety factor; and Hose conveying gas in a liquid state requires a 5x safety factor. (For example: a 150 PSI rated air hose has a 4x safety factor and must be successfully tested to a minimum of 600 PSI.)

Campbell's fitting and coupling pressure ratings match the RMA safety factor requirements with most hoses. Due to the wide variety of industrial hoses, as well as variations in design, construction, and material, we cannot guarantee that our pressure ratings meet the safety factor requirement with every hose.

If you have any questions about pressure ratings, please contact Campbell Fittings.

HYDROSTATIC TEST REPORT

Hose

Fuel drop: 3" ContiTech (GY) Infinity rated to 100 psi.

Couplings

Cam & Groove: 3" Campbell Cobra aluminum C x E
- coupling/sleeve system rated to 75 psi. WP

Attachment

Crimped: Aluminum Sleeves

Goal

Burst hose beyond 400 psi. (hose WP of 100 psi. @ 4 to 1 Safety Factor)

Results

Hose burst at 508 psi. (system exceeded 4x WP)

HYDROSTATIC TEST REPORT

Hose

Chemical: 2" ContiTech (GY) XLPE rated to 150 psi.

Couplings

ChemJoint®: 2" male x female
- coupling/ferrule system rated to 250 psi. WP (swivel nut tightened by hand)

Attachment

Crimped: Stainless Steel Ferrules

Goal

Burst hose beyond 600 psi. (hose WP of 150 psi. @ 4 to 1 Safety Factor)

Results

Hose burst at 1426 psi. (system exceeded 4x WP)

HYDROSTATIC TEST REPORT

Hose

Oilfield: 4" ContiTech (GY) FRAC Blender Hose rated to 400 psi.

Couplings

Crimpology Nipple: 4" FRAC-16 both ends*
- fitting/ferrule system rated to 400 psi WP

Attachment

Crimped: Campbell Frac Ferrules, Plated Steel

Goal

Burst hose beyond 1600 psi. (hose WP of 400 psi. @ 4 to 1 Safety Factor)

Results

Hose burst at 1715 psi. (system exceeded 4x WP)

* NOTE: similar successful results have been achieved with the Campbell "one-piece" 206 union manufactured with the same hose shank design for the same application.

HYDROSTATIC TEST REPORT

Hose

High pressure air: 3" Boston Bulldog Gold HP Air Hose rated to 600 psi.

Couplings

Ground Joint/Male Stem: 3" Heat Wave® male stem on both ends
- coupling/ferrule system rated to 600 psi WP

Attachment

Crimped: Staked-on Ferrule

Goal

Burst hose beyond 2400 psi. at 200°F (hose WP of 600 psi. @ 4 to 1 Safety Factor)

Results

Hose burst at 3539 psi. at 200°F (system exceeded 4x WP)

HYDROSTATIC TEST REPORT

Hose

Frac: 4" ContiTech Oilfield Fracturing Hose rated to 400 psi.

Couplings

206 Hose Union: Male x female Campbell 206 hose union rated to 400 psi.

Attachment

Crimped: Campbell Frac Ferrules, Plated Steel

Goal

Burst hose beyond 1600 psi. (hose WP of 400 psi. @ 4 to 1 Safety Factor)

Results

Hose burst at 1879 psi. (system exceeded 4x WP)

HYDROSTATIC TEST REPORT

Hose

High pressure air: 2" Dayco Wildcatter rated to 3000 psi.*

Couplings

Ground Joint: 2" Campbell Viton® Seal female x male
- coupling/ferrule system rated to 1000 psi. WP

Attachment

Crimped: Steel Long Ferrules

Goal

Establish the limits of the coupling/ferrule system, performed with the wing nut tightened only by hand. *NOTE: Campbell system is only rated to 1000 psi.

Results

Hose burst at 9500 psi. (couplings exceeded WP by more than 9x WP)

HYDROSTATIC TEST REPORT

Hose

Sanitary: 1-1/2" Continental Purple Snake rated to 232 psi.

Couplings

Sanitary: 1-1/2" Tri-Clamp
- fitting/ferrule system rated to 450 psi. WP

Attachment

Crimped: Stainless Steel Ferrules

Goal

Burst hose beyond 928 psi. (hose WP of 232 psi. @ 4 to 1 Safety Factor)

Results

Hose burst at 2198 psi. (system exceeded 9.5x WP)

HYDROSTATIC TEST REPORT

Hose

Layflat: 1-1/2" Kuriyama rated to 75 psi.

Couplings

Aluminum pin-lug: 1-1/2" Campbell male x female
- coupling/sleeve system rated to 150 psi.

Attachment

Crimped: Carbon Steel Sleeves

Goal

Burst hose beyond 225 psi. (hose WP of 75 psi. @ 3 to 1 Safety Factor)

Results

Hose burst at 228 psi. (system exceeded 3x WP)

Campbell Crimpnology™
offers crimping flexibility for your
multi-purpose hose applications.

COMBINATION NIPPLES AND MENDERS

Features & Benefits

- Maximum number of serrations for maximum holding power.
- Long lead serration for easier hose insertion.
- Formed hex wrench area on 3/4" through 1-1/2" combination nipples for easier installation.

Recommended Hose Attachment

- Sleeves
- Preformed Bands

Recommended Use

- Liquid, bulk handling, low-pressure air

SUCTION HOSE COUPLINGS

Features & Benefits

- Maximum number of serrations for maximum holding power.
- Long lead serration for easier hose insertion.
- Suction Couplings machined from pipe eliminate porosity and parting lines, improving sealing and retention.

Recommended Hose Attachment

- Sleeves
- Preformed Bands

Recommended Use

- Liquid, bulk handling

Manufacturing Suction Hose Couplings from pipe eliminates wide, flat mating surfaces at the male and female halves.

BALL & SOCKET COUPLINGS

Features & Benefits

- Proven, Campbell-style machined hose shank is designed for crimping (crimp specs available).
- Shank design dramatically improves sealing and retention, cuts installation time in half.
- Hose shanks are welded to ball & socket ball ends.

Recommended Hose Attachment

- Sleeves

Recommended Use

- Water Suction/Discharge
- Sewage bypass

Bauer-style vs. Campbell Ball & Socket

B Fittings for Critical Application or High Pressure Multi-Purpose Hose & Chemical Hose

Campbell Crimpnology™
offers crimping flexibility for your
multi-purpose hose applications.

Flanges meet
ANSI/ASME B16.5 150 pound
class specifications.

CRIMPNOLOGY NIPPLES

Features & Benefits

- Designed for use with Campbell Interlocking Ferrules.
- Fittings use the same ferrules as Campbell COBRA Parts C and E, ChemJoint Couplings, and ContiTech Insta-Lock Cam & Groove Couplings to keep ferrule inventory low and flexible.
- Interlock groove on fitting locks ferrule into place for the ultimate in holding power.
- Campbell's built in ferrule positioning stop eases and speeds crimping.
- Graduated serration pattern (sharper near the interlock, rounder near the end, with smooth end detail to reduce potential failure caused by abrasion) grips, seals, and protects hose.
- Shank and ferrule lengths are matched for performance and to avoid potential hose tube or cover damage.
- Crimped assemblies are low profile and eliminate sharp edges from band clamp buckles.

Crimpology Nipple

NEW! CRIMPNOLOGY SWIVEL

Features & Benefits

- 360° swivel rotation between the threaded hex and hose barb for easy installation, eliminates hose kinking.
- Threaded body includes hex wrench-flats.
- Viton O-Ring and snap ring inside hex area.

Special Features

- Crimpnology Nipples provide an excellent fitting solution for medium pressure applications such as "Frac Hose", mud-pump hose, and other abusive applications.
- Long Shank Crimpnology Nipples provide excellent sealing and retention for high-pressure applications. (See ratings chart below)
- 206 Hose Union machined from forged steel, eliminates porosity.

Crimpology Swivel

Note: Swivel is not for continuous rotation applications.

Swivel Hex Body

Campbell Crimpnology™ offers crimping flexibility for your liquid, bulk, and chemical transfer hose applications.

“CAMPBELL COBRA” VS. “STANDARD COBRA”

“COBRA” is the trade name for our entire line of Cam & Groove Couplings. “Campbell COBRA” is the upgraded version of Parts C and E. Although imported, Campbell COBRA C’s and E’s are designed by Campbell and produced to strict Campbell specifications.

Features & Benefits

- Designed for use with Campbell Interlocking Ferrules.
- 360° interlock groove on fitting locks ferrule into place for the ultimate in holding power.
- Shank and ferrule lengths are matched for performance and to avoid potential hose tube or hose cover damage.
**See picture on right.*
- Serrations designed to grip, seal, and protect hose when crimped.
Note: Traditional “two bump” designs are for banding, not crimping. Campbell does not recommend crimping on “two bump” shanks.
- Crimped assemblies are low profile and eliminate sharp edges from band clamp buckles.
- Couplings use the same ferrules as Crimpnology Nipples, ChemJoint Couplings, and ContiTech Insta-Lock Cam & Groove Couplings to keep your inventory to keep ferrule inventory low and flexible.
- Designed to couple and interchange with couplings made to specifications: ASTM F1122, CID A-A-59326, MIL-C-27487.

Recommended Hose Attachment

- Interlocking ferrules

Recommended Use

- Multi-purpose liquid, chemical, bulk handling

Campbell Cobra Part C and matching Campbell Interlocking Ferrule

Special Feature

- Locking handles can be purchased assembled onto the coupling or as a kit and retrofitted onto existing inventory ... another easy and cost-effective way to keep inventory flexible.

Couplings for High-Pressure Air and Steam Hose

Campbell Crimpnology™ offers hose assembly systems for your high-pressure steam and air applications.

VITON® SEAL GROUND JOINT COUPLINGS, AIR HAMMER COUPLINGS, AND MALE STEMS

Features & Benefits

- Viton® Seal Couplings pass 1000 hour MIL-H-29210 steam test.
- Eliminates leaks with hand-tightened nut.
- DuPont Viton® seal on hose stem is formulated for high pressure steam and air applications.
- Interchangeable with old-style ground joint couplings.
- Machined from carbon steel, cast ductile iron (meets ASTM A395 specification), and 316 stainless steel. *See picture on right.

STAKED-ON FERRULE FOR STEAM HOSE

Features & Benefits

- Designed specifically for certain hose brands. Check with factory for information.
- Viton® Seal Couplings pass 1000 hour MIL-H-29210 steam test.
- Crimped steam assemblies eliminate the need for retightening bolts.
- Eliminates leaks and cuts costs caused by leaky clamps.
- Ferrule serrations bite to the wire achieving electrical continuity.
- Meets 250 PSI pressure rating for steam applications.

SWIVEL INTERLOCKING MALE STEM

Features & Benefits

- Designed for use with steam.
- Available with staked-on ferrule for crimped steam applications.

NEW! HEATWAVE GROUND JOINT COUPLING SYSTEM

Features & Benefits

- Engineered to solve hose retention safety issues created by excessively high temperatures.
- One piece coupling/ferrule design.
- Machined ferrule utilizes a wave pattern, which gently displaces the hose evenly while pressing the tube into the coupling serrations.

Recommended Use

- Install one length of HeatWave Hose System at the compressor outlet to dissipate heat. Then attach standard crimped air hoses from the HeatWave System to the tools.

*See drawing below.

INTERLOCKING U-BOLT CLAMPS

Features & Benefits

- 360° design wraps completely around hose for superior retention.
- Clamps fit hoses tightly without cracking, eliminating costly rework.
- Bolts on “up side” allow easier tightening/retightening and improve “dragability”.
- Field repairable.

Couplings & Safety Couplings for Air and Water Hose

Campbell Crimpnology™ offers hose assembly systems for all your air applications.

Nitrogen Kills!

Nitrogen-only Single-Lock and Double-Lock Couplings.

Specify the patented yellow ring!

Simply the best and safest way to avoid deadly nitrogen accidents in plants.

Patented Nitrogen Ring

CAMPBELL SINGLE-LOCK (Bowes-style) DOUBLE-LOCK (Thor-style) COUPLINGS

Features and Benefits

- High strength zinc-aluminum alloy sleeves never rust, never seize or gall.
- Crimpnology hose ends provide the ultimate in hose retention.
- Interchangeable with other Bowes and Thor style couplings.

CAMPBELL SINGLE-LOCK (Nitrogen) DOUBLE-LOCK (Nitrogen) COUPLINGS

Features and Benefits

- High strength zinc-aluminum alloy sleeves never rust, never seize or gall.
- Crimpnology hose ends provide the ultimate in hose retention..
- Interchangeable with other Bowes and Thor style couplings.

SAFETY AND SAVINGS!

UniversaLock™, Single-Lock and Double-Lock couplings meet OSHA regulation 29CFR1915.131 and MSHA 30 CFR65.13021 requirements for Air Hose Couplings. The fine for an unpinned/unlocked air hose coupling can be \$800 or more per infraction. Save your customer money and headaches, by using Campbell's Safety Air Hose Couplings.

UNIVERSAL COUPLINGS AND UNIVERSALOCK™ COUPLINGS

Features and Benefits

- Mates with domestic and imported Universal Couplings.
- UniversaLock's automatically lock onto mating coupling.
- Crimpnology hose end for superior retention and sealing.
- Cast ductile iron meets ASTM A536 specification.
- Washers manufactured from nitrile for superior oil resistance.

Investment Cast Universal Hose Ends

- Investment casting provides a crisp, high quality, hose-end surface-finish, without costly machining.
- Crimpnology hose ends for superior retention and sealing.

Investment Cast Universal Hose Ends:

Campbell Crimpnology™ offers hose assembly systems for all your chemical applications!

ChemJoint Couplings are available with weld ends for use with metal hose.

CHEMJOUNT™ COUPLINGS & MALE STEMS

Description

ChemJoint™ Couplings and Male Stems create an extremely versatile Chemical Hose assembly system. The system solves problematic Cam and Groove issues such as pressure, temperature, side load, viscosity, line dedication and ergonomics.

Features and Benefits

- Graduated serration pattern - sharper near the interlock, rounder near the end. Grips and seals plastic lined Chemical Hose without cutting through the tube.
- 360° interlock groove on fitting locks ferrule into place for the ultimate in holding power.
- Crimped assemblies are low profile and eliminate sharp edges from bands.
- Viton® Seal allows coupling to meet pressure ratings with hand-tightened nut.

Recommended Hose Attachment

- Interlocking ferrules
- Preformed bands

1" ChemJoint™ Coupling Set

Campbell Crimpnology™ offers hose assembly systems for all your food grade hose applications!

**CRIMPNOLOGY
TRI-CLAMP FITTINGS**

Features & Benefits

- Crimp specs and procedures provided for all styles.
- For use with both Campbell standard slotted ferrules or I.D./O.D. machined ferrules.
- All ferrules are FDA approved 304 Stainless Steel.
- Shank and ferrule lengths are matched for performance and to avoid potential hose tube or hose cover damage.
- FDA approved Bumper helps to protect Tri-Clamp fitting.
- Recessed bumper area machined onto fitting allows easy installation or removal, even when in use.

TRI-CLAMP GASKETS

Features & Benefits

- Available in both Buna-N and reinforced silicone.
- Reinforced silicone offers superior sealing capabilities.

TRI-CLAMPS

Features & Benefits

- Designed for use with any Tri-Clamp fitting.

PROTECTIVE BUMPER

Features & Benefits

- Fits into machined recessed bumper area on all Campbell Tri-Clamp and Wine Fittings.
- Easy on/off installation.
- Manufactured from FDA approved silicone.

**CRIMPNOLOGY
WINE FITTINGS
(with Pacific Coast Threads - PCT)**

Features & Benefits

- Crimp specs and procedures provided for all styles.
- For use with Campbell ferrules and sleeves or band clamps.
- All ferrules and sleeves are FDA approved 304 Stainless Steel.
- Shank and ferrule lengths are matched for performance and to avoid potential hose tube or hose cover damage.
- Durable heavy duty forged brass Swivel Nut is damage resistant.

TESTING

All Campbell products are thoroughly tested to determine accurate performance data, such as pressure ratings and temperature derating data. See example of Tri-Clamp hydrostatic test below.

Hose: 1" ContiTech Grey Vintner
Working Pressure: 250 psi
Test temp: 70°F
Highest Test Pressure: 2039 psi.
Failure Mode: Hose burst beyond 8x WP

MAX. SYSTEM WORKING PRESSURE (PSI @ 70°F) SEE NOTE 1

Ferrules & Sleeves for High, Medium, and Low-Pressure Hose Systems

*Campbell Crimpnology™ ...
the only comprehensive package of
crimping products in the industry!*

CampbellCrimpnology™

Crimpnology refers to all of the technology involved in crimping: The integrated design of every fitting, coupling, ferrule, and sleeve; the crimp procedures; crimp specifications; and crimp training & support.

RELIEF BUMP

Prolongs the life of the hose assembly by relieving stress and failure points commonly found at the end of crimped fittings.

HOSE

FERRULE

FITTING

INTERLOCK

The turn-in of the ferrule interlocks with the machined groove on the fitting or coupling, providing a mechanical attachment for exceptional hose retention.

Features and Benefits

Crimpnology offers the following “7 Essentials” for crimping safe, repeatable, performance-rated hose systems:

- Interlock groove on all fittings and couplings is compatible with the turn-in end of the ferrule to ensure a 360° ferrule-to-fitting interlock.
- Serrations specifically designed for crimping provide maximum hose retention without potential tube failure.
- Shank length and ferrule/sleeve length are matched to maximize retention and to avoid hose tube or cover damage.
- Detailed assembly procedures are provided, including information to ensure use of compatible components.
- Detailed crimping procedures ensure appropriate crimp specification is derived for each hose and fitting combination.
- On-site crimping training by a Hose System Specialist is offered by Campbell Fittings to assist distributor personnel.
- A daytime, toll-free “hotline” is manned by a Campbell Hose System Specialist to assist in all aspects of crimping.

Performance Rated

All Campbell pressure ratings are established and verified by hydrostatic testing to a 4x safety factor where applicable (see page 1 for pressure rating information). Test data and information regarding various combinations of hoses and fittings are available upon request.

Note: Campbell sleeves may be used on non-Campbell fittings. We cannot provide crimp specifications or recommend working pressures for non-Campbell fittings. The pressure ratings in this catalog are valid only when using all Campbell parts. For safety and quality assurance, always proof test hose assembly according to NAHAD guidelines.

FERRULE & SLEEVE PART NUMBERING

PRODUCT	MATERIAL	FERRULE/SLEEVE I.D.
F = Ferrule	PS = Plated Steel	216 = 2-16/64"
S = Sleeve	SS = Stainless Steel	340 = 3-40/64"

F	PS	150	216	L
NOMINAL HOSE SIZE		NON-STANDARD LENGTH		
150 = 1-1/2"		L = Long		
200 = 2"		S = Short

304 Stainless

Glossary of Campbell Crimpnology™ Terms

Crimp Chart: a chart designed to assist in determining the crimp spec, which includes allowances for serration style, fitting and ferrule/sleeve O.D. and design.

Crimp Spec (or specification): the outside diameter of the ferrule/sleeve after assembling and crimping.

Cut-slots: notches cut into the turned-in end of a ferrule that allows the interlock portion to crimp straight down into the fitting interlock without opening outward during crimping.

Ferrule: a tube-like product with one end turned in, so as to affect an interlock into a groove on a mating fitting or coupling.

Ferrule Length: the overall length of the ferrule as measured from the turn-in end to the open end.

Ferrule/Sleeve I.D.: the inside bowl diameter of the ferrule; the inside diameter of the sleeve; the inside diameter of either where the hose is placed.

Gauge: the thickness of the ferrule/sleeve material.

Interlock Groove: a groove designed into the fitting/coupling to accept the turn-in end of the ferrule.

Shank Length: the hose barb area measured from the end of the fitting to the interlock groove.

Sleeve: a tube-like product with no interlock provisions.

Sleeve Length: the overall length of the sleeve from end to end.

Turn-in: the interlocking end of the ferrule.

Small Diameter Multi-Purpose Fittings

MALE & FEMALE INSERT FITTINGS

Insert fittings are precision screw machined in steel, stainless steel and brass.

Recommended use

- Low pressure air, water

Recommended hose attachment

- Brass Crimp-on Ferrules
- Worm Gear Clamps
- Preformed Band Clamps

BRASS PUSH-ON FITTINGS

Recommended use

- Low pressure air, water

Recommended hose attachment

- None - When used with special Push-on Hose, no clamp or ferrule is needed. The liner of the hose grabs securely onto the barb of the fitting.

DO NOT use Push-on Fittings with conventional hose.

BRASS GARDEN HOSE COUPLINGS

Precision screw machined from brass. Available with short shank or long shank.

Recommended use

- Low pressure water

Recommended hose attachment

- Brass Crimp-on Ferrules
- Worm Gear Clamps
- Preformed Band Clamps

BRASS FERRULES

Brass ferrules are lightweight, easy to assemble, and provide a smooth outer surface.

Recommended use

- Crimp-on hose assemblies to secure hose and fittings for low-pressure air and water applications

PREFORMED BAND CLAMPS**BAND-IT®**

All band clamps, banding, tools and accessories are genuine Band-It products. Ultra-Lok® and Jr® are registered trademarks of Band-It®.

ULTRA-LOK® CLAMPS

Ultra-Lok® Clamps are manufactured from 201 Stainless Steel. The buckle is thicker and stronger than standard band clamps for superior holding strength. The powerful Ultra-Lok® Tool is portable which enables the operator to bring the tool to the hose, instead of the hose to the tool, for much easier assembly.

JR®-TYPE PREFORMED CLAMPS

Jr®-type preformed clamps are available in both galvanized carbon steel and 201 stainless steel. All buckles are stainless steel.

Jr® clamps are designed for use with high production air tools, or the C001 Banding Tool.

PUNCH-TYPE PREFORMED CLAMPS

Punch type preformed clamps are available in galvanized carbon steel and 201 stainless steel. All buckles are stainless steel.

Punch clamps are designed for use with the punch style tool for the ultimate in field serviceability.

BANDING AND BUCKLES

Banding is cartoned in 100 foot rolls and available in 201 stainless steel. Buckles, sold separately, are 201 stainless steel. Banding features specially rolled edges to reduce the possibility of injury. Use the C001 Banding Tool to install.

WORM GEAR CLAMPS

Worm gear clamps are available in standard 1/2" band, miniature 5/16" band and quick release 1/2" band. All are manufactured with stainless steel band and stainless steel housing, with your choice of a carbon steel or stainless steel screw.

**T-BOLT CLAMPS**

T-Bolt clamps provide 360 degrees of sealing surface, and are particularly useful for high torque applications.

PRESSURE!**

Our Guarantee of Quality

WARRANTY – Campbell Fittings, Inc. warrants the products described herein to be free from defects in materials or workmanship for a period of one year from the date of shipment by Campbell Fittings, Inc. under normal use and service. The obligation under this warranty is limited to replacing or repairing, without charge, any part supplied by Campbell Fittings, Inc. proven to have been defective at time of shipment, and is expressly conditioned on the Purchaser's giving Campbell Fittings, Inc. immediate notice upon discovery of the defect. Campbell Fittings, Inc. shall have the option of requiring the return of the defective material (transportation prepaid) to establish the claim.

This warranty shall not apply if the product has been altered or repaired by others, and Campbell Fittings, Inc. shall make no allowance or credit for such repairs or alterations unless authorized in writing by Campbell Fittings, Inc.

The foregoing warranty is the only warranty applicable to the products described herein, and any previous agreements, representations or warranties, oral or written, are hereby cancelled. No other expressed or implied warranties shall apply, including but not limited to implied warranties of merchantability and fitness for a particular use.

Under no circumstances will Campbell Fittings, Inc. assume any liability whatsoever for any consequential or contingent damages.

PRODUCT CHANGES – The right is reserved to make changes in pattern, design or material when deemed necessary, without notice. Products which have become obsolete by reason of design change or discontinued as a manufactured item may not be returned for credit.

RETURNED GOODS – Materials must not be returned unless consent has first been obtained in writing from Campbell Fittings, Inc. All materials approved for return must arrive properly packaged and pass our inspection criteria before credit will be issued. Returned products are subject to restocking fees.

RESPONSIBILITY – We will not be responsible for delays resulting from strikes, accidents, negligence of carriers, or other causes beyond our control.

RISK – All goods are at the risk of the Purchaser after they have been delivered to the carrier and receipt obtained for same (in good order).

ORDERS – Are subject to acceptance at Campbell Fittings, Inc., Boyertown, PA 19512.

SPECIAL PRODUCTS – Requests for cancellation of orders made to customer's specifications are not refundable and will not be considered if the manufacture of material is in process when the request is made.

ERRORS, SHORTAGES, ETC. – Claims for errors, shortages, etc. must be made on receipt of goods, otherwise no allowance will be made.

PRICES AND QUOTATIONS – All prices and quotations are subject to change without notice.

TAXES – Any tax that may be imposed by law on the sale of articles made or sold by this company shall be added to the sale price of such articles.

LIABILITY WARNING – Campbell Fittings, Inc. has no warranty applicable to fitness for the purpose of a particular use of any of the products it sells or issues as samples and shall not be responsible for any loss involving its products. It is entirely the responsibility of the end user or installer to be sure that fittings, hose, and their applications are compatible.
